

IV. REMARKS

Claims 1 and 16 have been amended to recite that the location information is determined using the global positioning system (see page 5, lines 19-21). This is obviously a far more accurate method than that shown in Chatterjee, which merely locates the terminal to a cell area at best. Tiedemann fails to disclose any location transmission. Thus even if these references are combined, the result is not the present invention.

It is also noted that there is no suggestion to combine the two references as required by Ex parte Jones, 62 USPQ2d 1206, 1208, and Ex parte Metcalf 67 USPQ2d 1633, 1635.

Therefore the rejection of claims 1-7, 9, 16 and 18 under 35 USC 103 on these references should be withdrawn.

Also, Lee fails to disclose the claimed GPS feature. Thus the rejection of claim 10 under 35 USC 103 should be withdrawn since combining Lee with Tiedemann and Chatterjee does not result in the present invention.

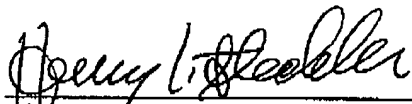

Further, Sarpola also fails to disclose the GPS feature. Thus the rejection of claims 11-15 and 19-22 under 35 USC 103 should be withdrawn since combining Sarpola with Tiedemann and Chatterjee does not result in the present invention.

For all of the foregoing reasons, it is respectfully submitted that all of the claims now present in the application are clearly novel and patentable over the prior art of record, and are in proper form for allowance. Accordingly, favorable reconsideration and allowance is respectfully requested. Should

any unresolved issues remain, the Examiner is invited to call Applicants' attorney at the telephone number indicated below.

The Commissioner is hereby authorized to charge the amount \$110.00 for payment of a one month extension and for any fees associated with this communication or credit any over payment to Deposit Account No. 16-1350.

Respectfully submitted,

Henry L. Steckler
